- To exchange experiences & learn from one another
- Warmth in networking

IDA-ISS Statement

1. Drive ***user-centric, problem-driven innovation***, balancing technology application & human touch for fast and effective deployment of ICT to support an ageing society and people with special needs
2. Aim for ***simplicity to achieve big results*** with small means: smart use of technology for a smarter city
3. Continue to build ***new capabilities*** and leverage on ***3P (public-private-people) partnership*** to improve our people's quality of life
4. Continue to promote ***cross-border collaboration*** to share knowledge & experience for a smarter & digitally inclusive society.
